ABOUT ME

Data and BI Analyst experienced in building end-to-end data warehouses using Medallion Architecture and modern data stacks. Skilled in stakeholder communication, defining business logic, data modeling, and ensuring data integrity and a Single Source of Truth (SSOT).

EXPERIENCE

BUSINESS INTELLIGENCE EXECUTIVE (DIGIWORLD CORPORATION)

04/2025 – Present

Data Platform & Analytics Engineering

- **Collaborated** with stakeholders to **migrate business logic** from legacy BI layers into a **Medallion Architecture Data Warehouse** (using **dbt** to implement SCDs, indexing, and partitioning), optimizing data lineage for core SAP modules (MM, SD, FICO).
- **Designed the data model** and developed Python scripts for **automated discrepancy detection**.
- Reduced extraction times from **5 minutes to 1 minute** by streamlining data sources and establishing the data warehouse.

Sales Fund Analytics Automation Product

- **Independently migrated** fragmented Excel workflows to **centralized data product** using **SAP HANA, Python, and Tableau**.
- Communicated with report owners to **audit business logic**, *design data model*, and develop a framework to track data gaps.
- Established the first **Single Source of Truth (SSOT)**, reducing settlement cycles from **10 days to 2 days**.

Supply Chain Cost Transformation

- **Self-identified limitations** in legacy cost calculations caused by manual data downloads and unscalable SQL scripts.
- Owned an **end-to-end automated data workflow** by leveraging **SQL window functions** for complex cost allocations, **stored procedures** for historical tracking, and **Python** for cross-platform data extraction and report generation.
- Reduced processing time from **3 days to 1 hour** and increased **reporting granularity** (brand group to SKU level).

Analytics Governance & BI Enablement

- **Optimized** Tableau server performance and user licenses using **Python** and **Tableau REST API**.
- Identified full-load inefficiencies and developed a validation framework, enabling targeted **incremental synchronization**.
- Partnered with department heads to define **core KPIs** and delivered **executive dashboards/reports**.

DATA ANALYST INTERN (INTER-K JOINT STOCK COMPANY)

07/2024 – 01/2025

- **Co-migrated 50+** legacy Crystal Reports to Power BI Paginated Reports, owning the delivery of **10 core reports**.
- **Developed optimized queries** to fetch data for paginated layouts and established blueprint documentation.

PROJECTS

Modern Data Stack Platform Prototype

[view_project](#)

- Built a local data infrastructure leveraging **S3, PostgreSQL, dbt, Airflow and Git** to simulate a data ELT/ETL workflow.
- Developed **metadata-driven** Airflow DAGs for scalable data ingestion and transformation.
- Designed the data model, transformed data, and optimized pipeline runtimes via SQL **indexing** and table **partitioning**.

Sales Performance Analysis (SQL, Power BI, Python)

[view_project](#)

- Conducted **RFM segmentation** and **Market Basket Analysis** to identify customer segments and cross-selling patterns.
- Designed an **interactive Power BI dashboard** tracking key sales metrics, conversion rates, and revenue growth.
- Delivered **data-driven recommendations** on pricing optimization and product bundling.

SKILLS AND CERTIFICATIONS

- **Data Platform:** Data Modeling, Medallion Architecture, ELT/ETL, Semantic Layer, Governance
- **Analytics Engineering:** Logic Transformation, Metric Standardization, Data Quality
- **Tools:** Python, SQL, dbt, Airflow, SAP S/4HANA, Tableau, Power BI, Git
- **Certifications & Training:** CFA Level I (2025), HackerRank SQL Advanced (2024), Data Analyst Program – MindX (2023)

EDUCATION

University of Science – HCMUS (2025 – Present) — BSc in Information Technology (2nd Degree)

Foreign Trade University – FTU2 (2020 – 2024) — BSc in International Business Economics
